

Being a flight attendant for 34 years, I believe gives me some experience in responding to this!!! No one listens to us anymore, and if cell phones are ever to be used at all times...it would create chaos....people who talk too loud now are annoying and everyone talking at the same time would have "air rage" at an all time high!!! Terriosts giving EXACT info at the correct time to someone else on another plane or "sleeper" on the plane, drunks talking louder, angry people...lets leave well enough alone and KEEP some peace and quiet on the plane...it's load enough....lets NOT add fuel to any mores fires!!!!
